

Exploration and Appraisal Drilling Update February 2019

(ASX:OSH | ADR: OISHY | POMSoX: OSH)

7 March 2019

| | |
|------------------------------|--|
| Well Name | Muruk 2 |
| Well Type | Appraisal |
| Location | PDL 9, Highlands, PNG (approximately 11 kilometres north-west of Muruk 1) |
| Spud Date | 10 November 2018 |
| Rig | High Arctic Rig 104 |
| Objective/ Target | Cretaceous Toro Sandstone. The objective of Muruk 2 is to constrain the potential resource volumes in the field. |
| Status | <p>During the month, 37.4 metres of core was cut in the objective Toro reservoir and the well was deepened to 3,820 metres. An extensive logging programme was conducted which has confirmed the presence of hydrocarbons.</p> <p>The forward plan is to conduct an extended well test over the Toro reservoir interval.</p> |

Operator Oil Search (on behalf of Esso PNG Juha Ltd)

| | | |
|---------------------------------|------------------------------|-------------|
| Participants¹ | | |
| | Oil Search (Tumbudu) Ltd | 24.4% |
| | Esso PNG Juha Ltd | 21.7% |
| | Ampolex (PNG) Ltd | 21.7% |
| | Kumul Petroleum (Kroton) Ltd | 20.5% |
| | Nippon PNG LNG LLC | 9.7% |
| | Gas Resources Juha No. 1 Ltd | 2.0% |
| | Total | 100% |

¹ Gross interests, pre-Government and landowner back-in rounded to 1 decimal place

Well Name Pikka B ST1

Well Type Appraisal, sidetrack

Location Pikka Unit, Alaska North Slope

Spud Date 23 January 2019

Rig Doyon Arctic Fox

Objective/Target Cretaceous Brookian Sandstone (Nanushuk). The objective of Pikka B ST1 is to constrain the potential resource volumes in the field.

Status During the month, the Pikka B side track was drilled to a depth of 2,621 metres (8,599 feet), encountering the Nanushuk 3 sands. 91 metres (300 feet) of cores were cut from the formation. The side-track core was oil saturated, like the initial Pikka B core, with high quality rock observed.

Flow-testing of the well has commenced. This will help establish flow rates and other data, including the volume, thickness and quality of the Nanushuk reservoir at this location.

Operator Oil Search

| Participants | | |
|------------------------------|--|--------|
| Oil Search (Alaska) LLC | | 25.5% |
| Repsol E&P USA, Inc. | | 49.0% |
| Armstrong Energy, LLC | | 19.1% |
| GMT Exploration Company, LLC | | 6.4% |
| Total | | 100.0% |

Well Name Pikka C

Well Type Appraisal

Location Pikka Unit, Alaska North Slope

Spud Date 23 January 2019

Rig Nabors 105E

**Objective/
Target** Cretaceous Brookian Sandstone (Nanushuk).
The objective of Pikka C is to reduce uncertainty on well deliverability by drilling a “proof of concept” development-type well.

Status During the month, the Pikka C well drilled through the Nanushuk formation to a depth of 1,601 metres (5,253 feet) and wireline logging activities were completed. Casing was set and a horizontal side-track well, Pikka C ST1, was kicked off from a depth of 978 metres (3,210 feet). Pikka C ST1 drilled a 1,006 metre (3,300 feet) lateral section in the reservoir to a total depth of 2,772 metres (9,093 feet).

The forward plan is to stimulate and flow-test the well.

Operator Oil Search

| Participants | | |
